

Advanced Business Manager for Construction Sector

Software Support Systems Ltd has significant expertise in the construction sector and is recommended by the Construction Industry Federation as a supplier to its industry. With over 160 clients, you can benefit from our in-depth understanding of your industry, allowing us to tailor the most appropriate IT systems to your business.

ABM financial accounting provides a complete system tailored for the construction industry. Based on the Microsoft SQL server platform, it is real time and totally integrated. As ABM is also modular, you just choose the features that you suit your business needs.

Software Support Systems – expert partner to the Construction Industry and recommended by the Construction Industry Federation.

Case Study 1: **Ashbrook Engineering**

Industry: **Mechanical Services Contractors**

Product: **Advanced Business Manager**

"The efficiency and accuracy of the information available to our business from ABM is excellent."
Eamon Walsh, MD, Ashbrook Engineering.

"Today's highly competitive market demands quick informed decisions based on a holistic view of our business. In an industry where the success of an individual job can make or break some companies, technology is key.

When selecting our accounting solution, it was important to select one that suited our industry and that has proper on-going support. With this in mind, we selected Advanced Business Manager accounting software, a totally integrated solution provided by Software Support Systems. It is refreshing to work with a company that understands our business and is able to provide valuable advice on the system setup.

All our costs are trapped at purchase order and payroll stage. This ensures that timely information is constantly flowing throughout the organisation. We enter our estimates for each project and when the costs are charged against element specific categories, we can accurately track actual costs against budget on an almost real time basis. The efficiency and accuracy of the information available within the company is excellent. Every posting appears in real-time so we can compare what is on order, delivered and invoiced and even what's paid. This transports straight through to nominal ledger so not only are my job costs up-to-date, so are my management accounts.

This has been an invaluable investment and has grown with our business to make us one of the market leaders in our field."

Eamon Walsh, MD, Ashbrook Engineering.

Case Study 2: CLG Developments Ltd.

Industry: Civil Engineering and Construction

Product: Advanced Business Manager

"We have been dealing with Software Support Systems Ltd since 1998 and I can request assistance in any area of our business that has to do with IT."

Tara McCormack, IT Manager, CLG Developments Ltd

"Founded in 1979, CLG is a Civil Engineering and Construction company with an impressive portfolio of successfully completed contracts including Rosslare Harbour and Charlemont Bridge (LUAS). CLG clients include the ESB, Iarnrod Eireann, the Department of Justice, Equality and Law Reform and many more.

With such an extensive range of sizeable and complex projects, tight accounting control with easy access to real time business information is paramount. Furthermore, we must have absolute confidence in our IT solution.

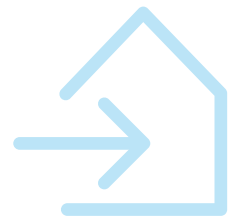

We have been dealing with Software Support Systems since 1998 and I can request assistance in any area of our business that has to do with IT. They provide us with ABM accounting software which handles our requirements perfectly. Committed costs per team and site manager reports are provided on a weekly basis. It integrates with the payroll and our specialist plant systems and is configured to operate with Microsoft terminal services option.

With ABM accounting, our business can grow in any direction. If we require additional fields, reports or integration to specialist applications, it is available to us.

We have a number of offices countrywide and it is very important to have one service provider. If we have a problem with hardware or software, we have a one-stop-shop.

Our experience of their admirable support and genuine interest in our business makes us view Software Support Systems as our long-term business partner."

Tara McCormack, IT Manager, CLG Developments Ltd.
