

Online Backup Protect Your Data

Data is your most valuable asset!

Traditional PC and Server backup is expensive, unreliable and time consuming. Restoration of files is often problematic. Research shows that 50% of companies that loose a substantial amount of their critical data in a disaster never reopen for business. Data4Sure from Software Support Systems brings you our online backup service that performs seamlessly in the background. Infinitely superior to traditional backups on tape or disk, you don't have to rely on error-sensitive media or carry out manual actions. Data4Sure from Software Support Systems Ltd automatically creates backups that are instantly encrypted and stored off site in our data centres. All your data is available and retrievable 24/7. There are no capex costs to you. Data4Sure scales with your business whatever its size. Data4Sure helps with compliance legislation. So if you want peace of mind, that your data is secure visit our website at www.data4sure.ie and try us for free.

WHY BACKUP ONLINE

SOFTWARE CORRUPTION

Software corruption or program error is probably the best known form of data loss.

VIRUSES, SPYWARE AND HACKERS

Protect your data from these threats.

DRIVE FAILURE

Up to 13% of hard drives crash in their first year. Hard drives that are over five years old have a 6% chance of failing.

ACCIDENTAL DELETION

43% of people lose irreplaceable files every year

THEFT

Only 3 out of every 100 stolen laptops are recovered.

DISASTER

Vital data is lost every year primarily through accidental deletion. Other factors that contribute to data loss include e-crime, theft, fires, floods, and other disasters.

COMPLIANCE

Software Support Systems can help you address legislation surrounding data backup archival and compliance. Our solution meets many compliance standard requirements and enables your company to adhere to the directives in the acts that apply to it.
